

New!

CRESCENT™ Series
6" Deck Rail Light

Evening Star Lighting now offers two styles of its popular **CRESCENT™** series fixture for traditional wood decking. A single faceplate version for easy mounting under the *intermittent* top rail, and a double faceplate version for the *continuous* top rail.

The **CRESCENT™** series feature a 12 volt, 8 watt, snap-in, double bulb Lamp Module™ that replaces easily without tools. Advanced optics fixed at a 30 degree angle project a smooth, diffused wash of illumination onto the decks surface where it is needed most. An optional amber color bug Light Lamp Module™ is available to ward off flying and swarming insects.

The commercial grade stainless steel fixture includes a 72 inch Wire Harness, cable connector, and mounting hardware. Faceplates are available in several designer and powder-coated faux finish options.
